Provider Assessment Feedback

ALLISON SLAUBAUGH - RN,BSN SPIRIT LAKE HEALTH CENTER

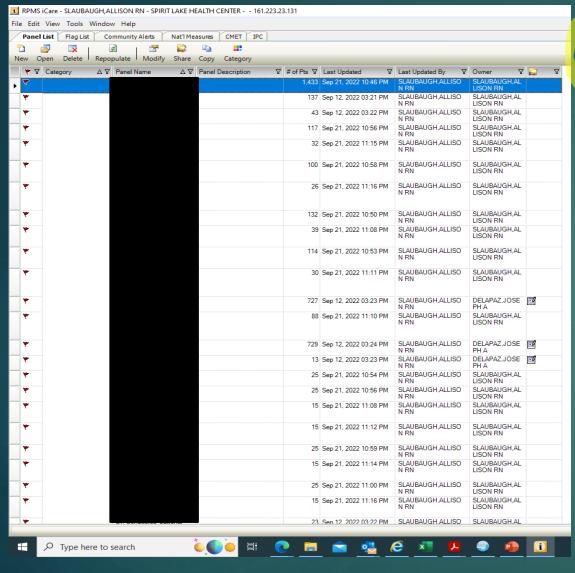

About Spirit Lake Health Center

- Spirit Lake Health Center has a Behavioral Health Clinic, Dental Clinic, and Medical Clinic
- SLHC currently has 5 providers in the Medical Clinic
 - ▶ 1-MD
 - ▶ 4-NP's
- 4 providers left within the last 6 months that are still included in the data
- SLHC uses GPRA for tracking screening rates

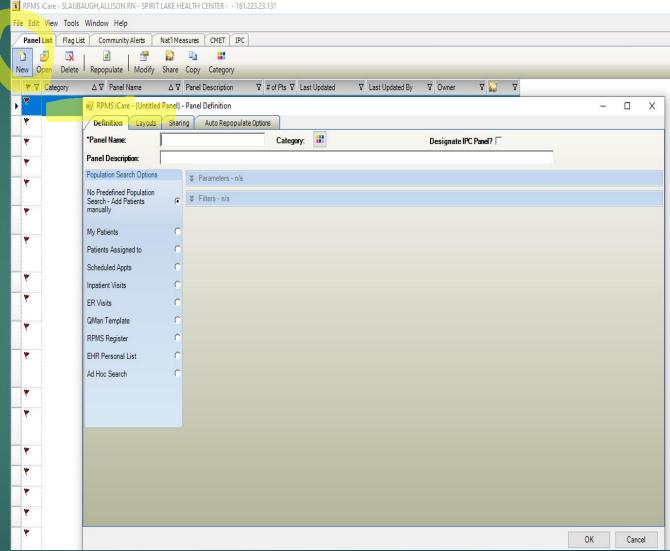

Screening Rates and Data For SLHC

- CRC screening Rates for GPRA do not seem to match up with CRC screening rates of clinics that do not use GPRA
- August 2022 GPRA rate for CRC screening for SLHC was 36.89%
- Wanted to find a way to provide Provider Assessment and Feedback on an individual level
- Was able to figure out how to run reports using I-Care to provide CRC screening rates of individual providers
- Results of reports from I-Care match more closely with rates from clinics that do not use GPRA data

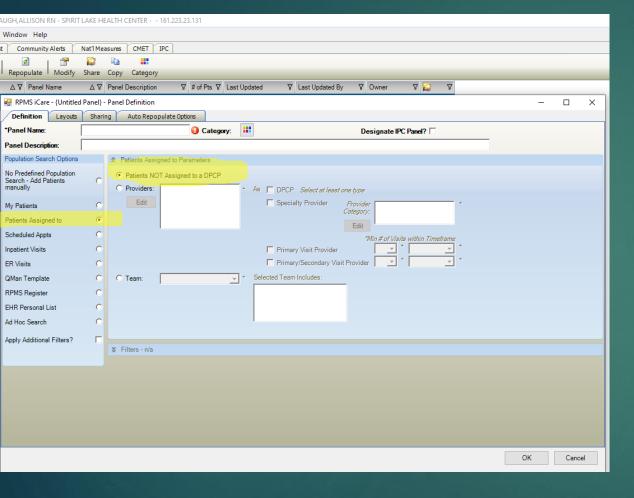

1. Open panel list

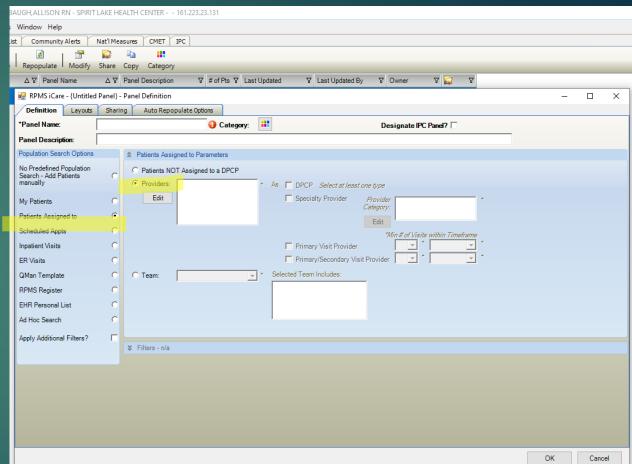

2. Select new to create new panel, name the panel

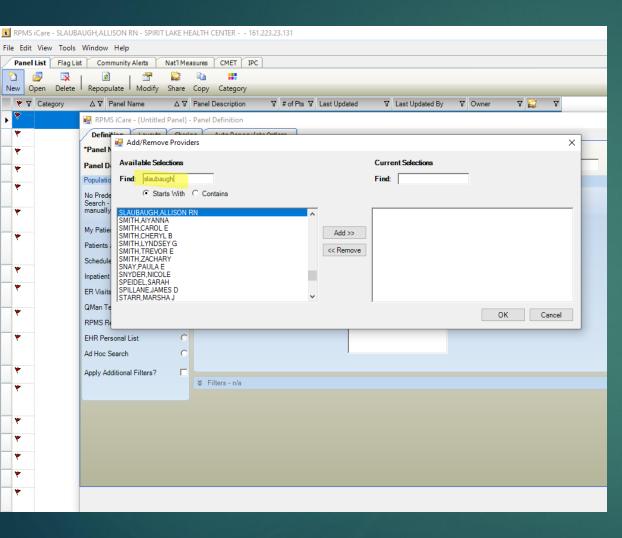

3. Select "Patients Assigned to," and select "Patients NOT Assigned to a DPCP"

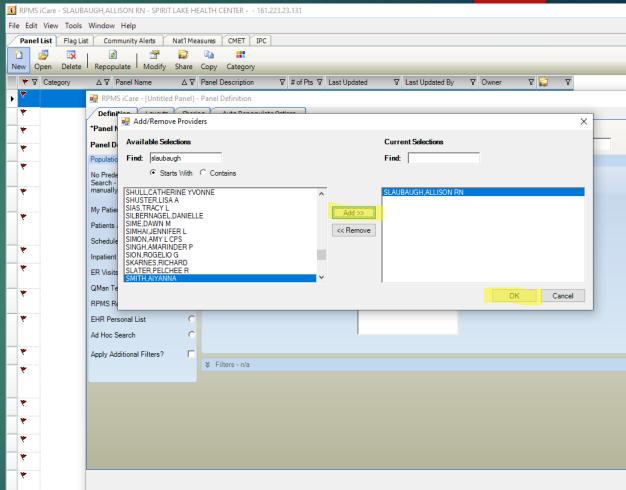

Or Select "Patients Assigned to," Select "Providers", and Select "Edit" to choose a specific provider

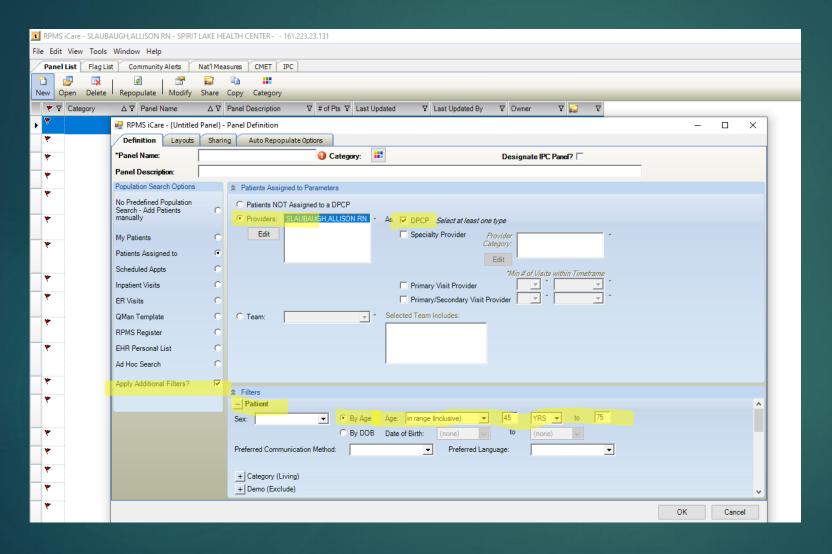

5. Type providers last name in "Find" box, make sure providers name is highlighted in blue

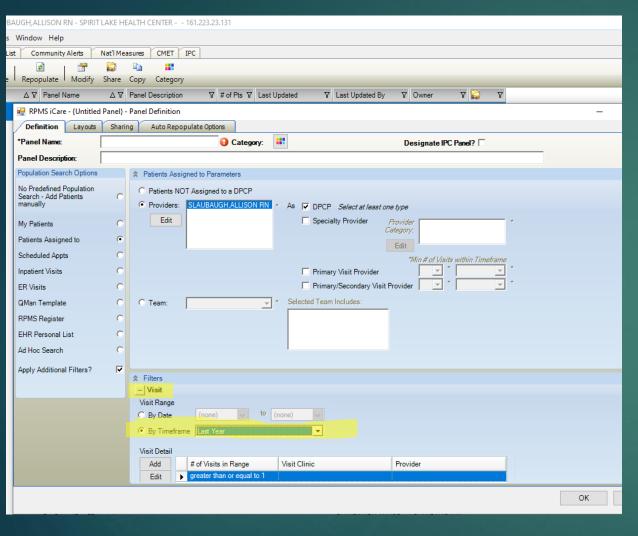

6. Select "add," Select "ok"

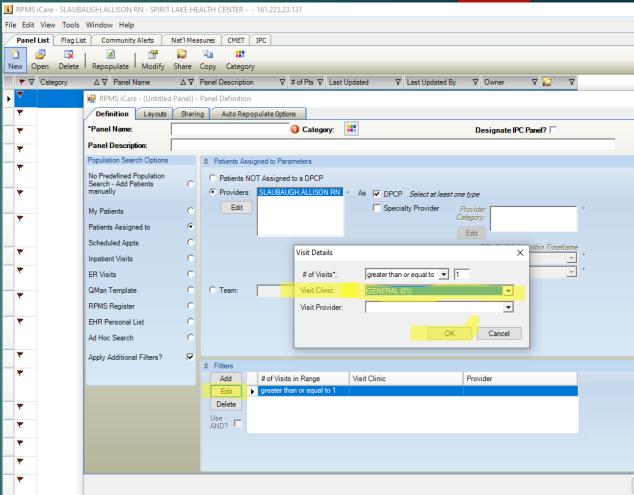

7. Check box next to "DPCP", Check "Apply additional filters," Under Patient filter select "by Age," select "in range (inclusive)" from drop down menu, add in 45 to 75 yrs

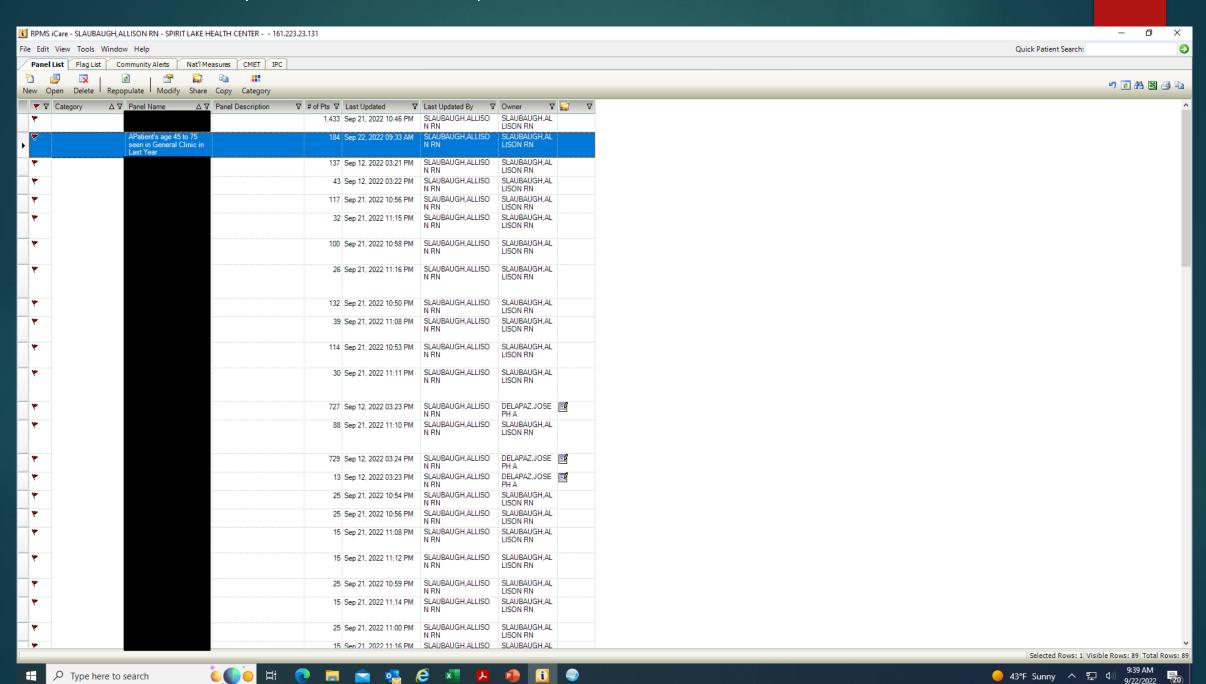

8. Under visit filter, select "by timeframe," select "last year" from drop down menu

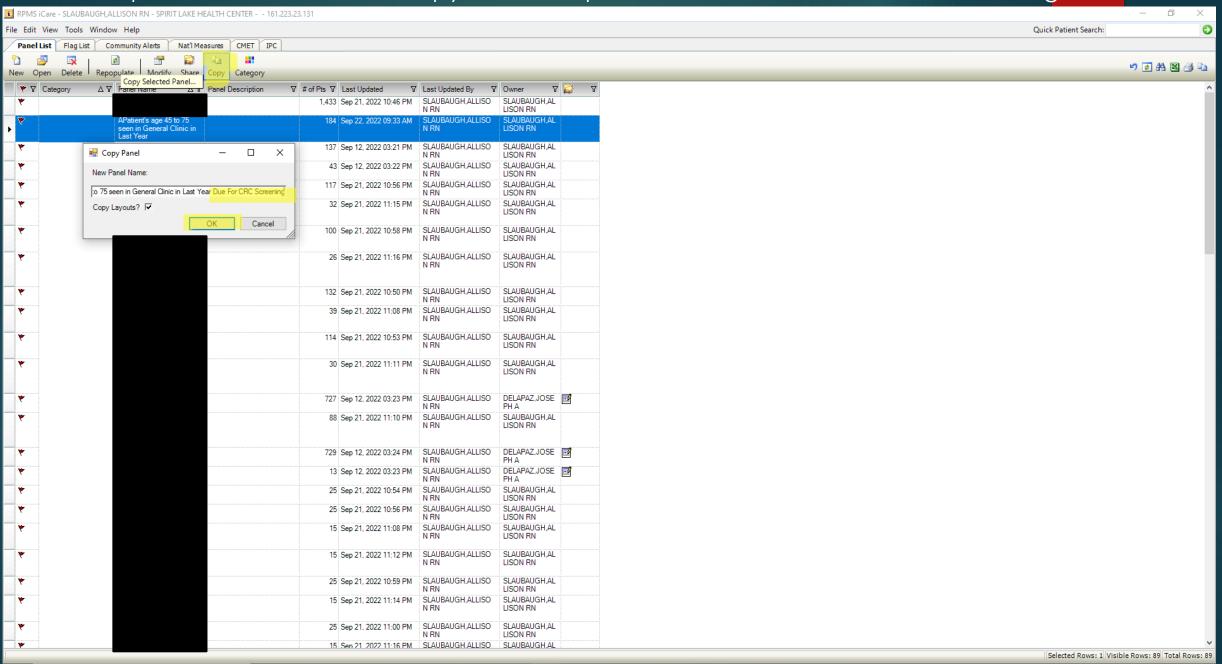

9. Under same visit filter select "edit," select "General (01)" under drop down menu for visit clinic, select "ok"

10. Panel will be in panel list under title provided

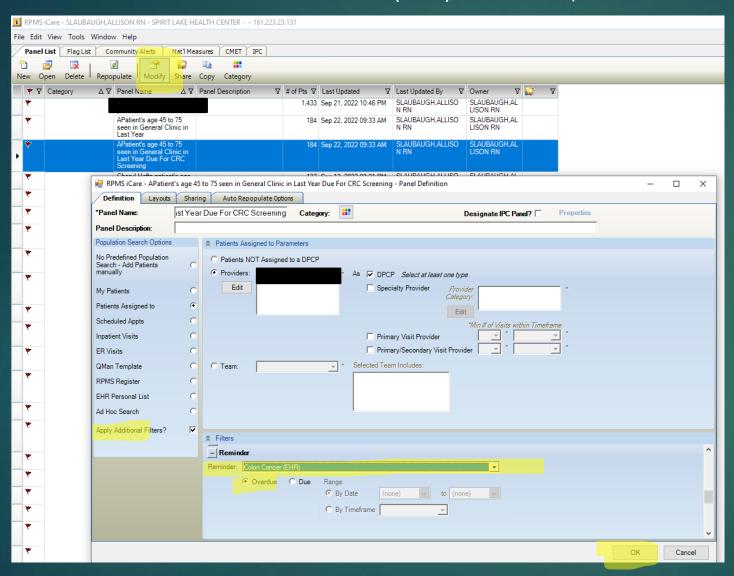

11. Select panel created, select "copy," rename panel to include "due for CRC screening"

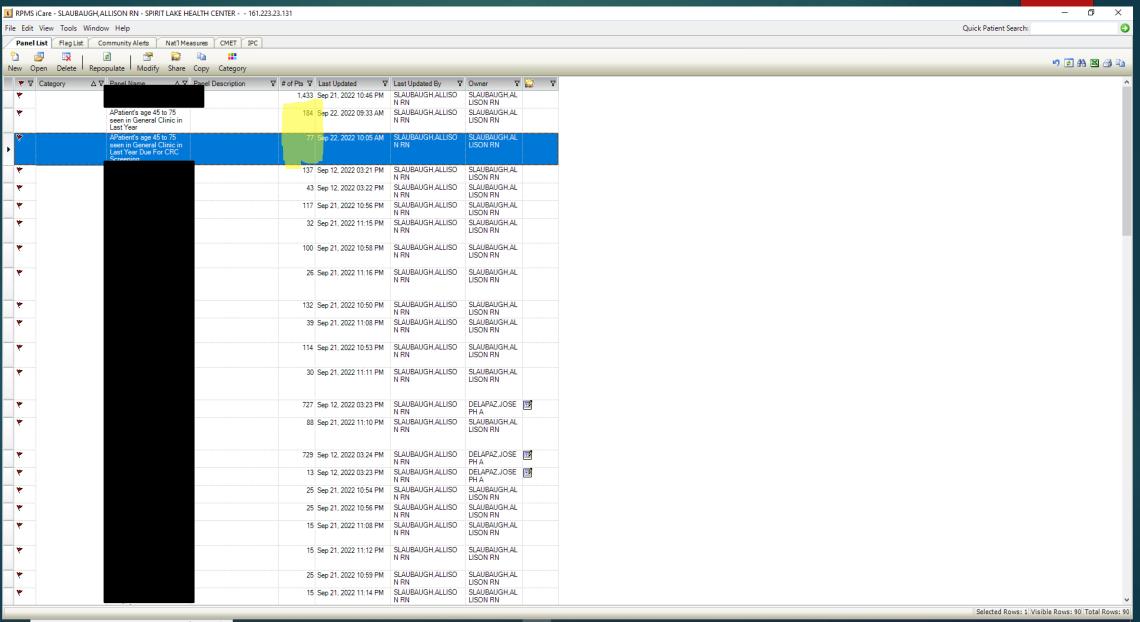

Type here to search

● 43°F Sunny ヘ 駅 切 9:43 AM 9/22/2022

12. Have renamed panel highlighted in blue, select "modify," under filters, go to "reminder," select "Colon Cancer (EHR)" from drop down menu, select "overdue" and "ok"

13. Subtract number of patients due for CRC Screening from total number of patients to get number of patients screened

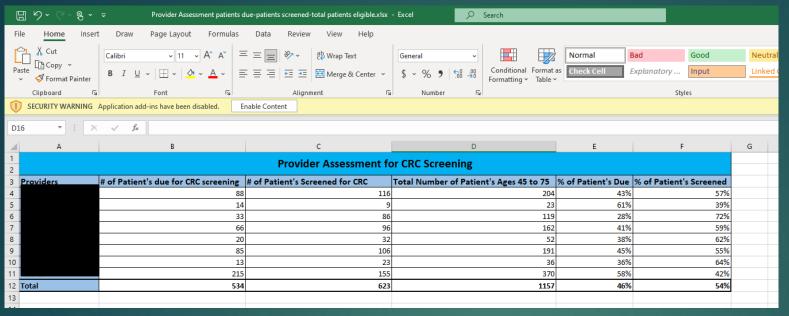

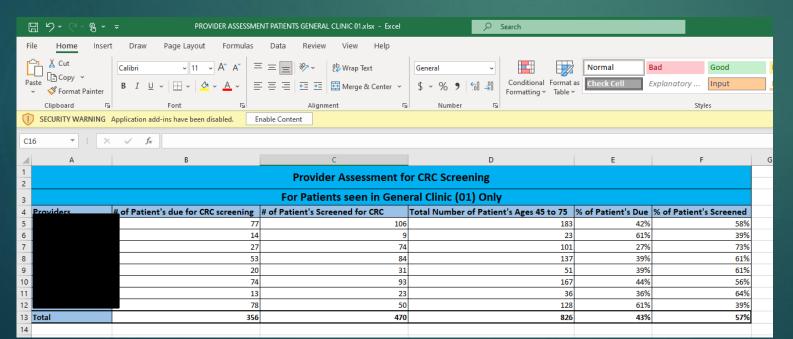

Patients seen in the last year

Patient's seen in the last year in General Clinic (01)

GPRA Rates vs. Provider Assessment and Feedback rates

- August 2022 GPRA rate 36.89%
- August 2022 Provider Assessment and Feedback rate 54%

- September 2022 GPRA rate 37.31%
- September 2022 Provider Assessment and Feedback rate 58%

- October 2022 GPRA rate 37.49%
- October 2022 Provider Assessment and Feedback rate 58%

Community Approach to Screening, Tracking and Follow-up

Mikisha Longie, RN

Quentin N. Burdick – Public Health

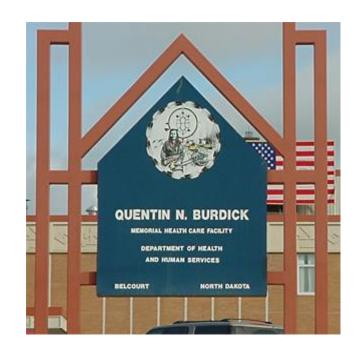

Mikisha Longie, RN BSN QNBMHCF

Introduction

- Quentin N Burdick Memorial Healthcare Facility-Belcourt, ND.
- Serves the Native American population of the Turtle Mountain Indian Reservation
- Approximately 13,600 active patients to date

Quentin N Burdick Memorial Healthcare Facility

- 4 mid level providers Outpatient Clinic
- 8 MD providers Outpatient Clinic
- Services offered in Outpatient Clinic include:
 - OB/GYN
 - Podiatry
 - Women's Health
 - Men's Health
 - Pediatrics
 - Same Day Clinic

Strategies for FIT return

Gas incentives

Education

Personal Story

Barriers to FIT testing

- Age
- Not Me.....
- Concept of collecting sample
- Time Constraints

Interventions

- Community Distribution
 - Mobile Unit
 - Community Events
 - Public Health Office
 - Outpatient Department
 - EDUCATION!!!!

- Tracking and follow-up
 - Chart Reviews
 - Reminder Letters

- Communication with patient
 - Reminder Letters
 - Follow-up telephone Calls
- Communication with Provider
 - Standing Orders for FIT test
 - Ensuring follow-up for positive FIT screen

Results

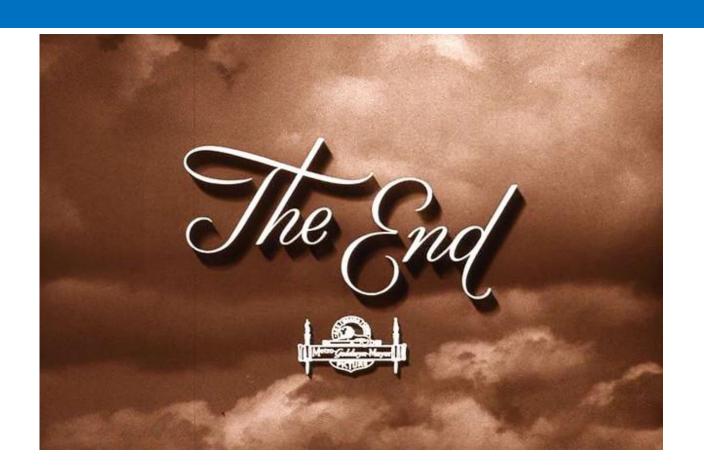

Total FIT Kits Distributed March-October 2022

- 124 FIT kits distributed:
 - Rollin Colon
 - SkyDancer Casino
 - Public Health Nursing

FIT Kits Returned

- 56 FIT kits returned
 - Positive: 15
 - Negative: 41
 - 45.1% Return Rate
 - 73.2% Negative
 - 26.78% Positive

Thank you for your time

Experience Using Cologuard as a Screening Tool

Colorectal Cancer Screening

Goal: Increase screening rates by offering and educating patients on screenings available

- 1. FIT testing annual
- 2. Cologuard every 3 years
- 3. Colonoscopy referral 1 to 10 years

First Steps: In-person training for providers and nursing staff with Cologuard Representative at our facility on 12/17/2022 arranged by NDScreen staff

- 1. Cologuard overview & specifics
- 2. Cologuard Kit Demonstration
- 3. Q & A

Things still in progress

- -Area wide contract for Exact Sciences
- -Working on facility contract
- -PRC funds to cover

What has worked well

- -after the training, it was decided by administration that we would start phasing into this screening
- -have started by offering as an option to patient's with private insurance
- -covered by all insurances
- -kits are delivered to the patient's home
 - -has worked well for those patients that travel to our facilities (some from as far away as 100 miles)
- -kits can be delivered to the patient doorstep, once collected, call the 800 number and are picked up from the doorstep
- -do not pay for the kit until a result is obtained

Exact Sciences

- -easy to register providers
- -can have a site administrator for all of the providers to run reports
- -results are faxed and can be looked up in the site
- -can place order through the site or can complete on paper
- -has an 800 number that you can call with questions

Barriers

- -patients living in rural ND/SD and having PO Boxes need to have a shipping address for UPS
- -having Cologuard box sitting at their doorstep
- -patients not returning kits
- -patient concerns about collecting DNA samples
